Progress on Code/Requirements
- Font changes
  - weight/size/color
- Background change
  - Change position of background texture to be zoomed out and repeating
- Border changes for photos and information to flex with page and be compatible for windows of varying sizes

Issues opened
- Attempted parallax effect but unable due to inherited files inaccessible

Team Reflection
- As in the previous spring, we were limited in the changes we were able to make without messing up and changing the whole size as many aspects are inherited across multiple pages and sites such as W3Schools. Regardless, we did what we could to make the site more visually appealing, and so that the information displayed is more organized.
